

Q-Q analysis — Lorenz forecaster residuals: QLNN vs non-liquid Neural-ODE baseline (3 seeds × 200 steps × 3 states each)

Neural-ODE (non-liquid) — Q-Q vs Normal
Shapiro W=0.978, p=5.49e-16

QLNN strongly_entangling — Q-Q vs Normal
Shapiro W=0.916, p=2e-30

Two-sample Q-Q: Neural-ODE vs QLNN strongly_entangling
KS D=0.183, p=7.66e-27 (reject H_0 equal distributions)
